SKILLS

ABOUT ME

I'm a lead backend developer (product development) with 7+ years of extensive experience in complete software development lifecycle using agile scrum methodology.

- Proficient in object-oriented programming (OOPS) concepts with experience in Java associated technologies and design patterns and principles.
- 7+ years of experience with Java/J2EE, Hibernate, Spring Framework, RESTful Services, RabbitMQ, SQL and other technologies.
- 3+ years of experience in Spring Boot and developing microservices with AWS.
- Strong exposure in test driven development (TDD) using Mockito and Junit.
- Good hands-on experience with Angular applications using Bootstrap, HTML & CSS.

EXPERIENCE

Senior Software Engineer

Netcracker Technology Solutions | Bengaluru | Jan 2019 to present

Working as a Senior Software Engineer on the development of end-to-end solutions like Internet Protocol Television and Darwin, as well as leading a team of developers to deliver solutions.

- Analyze business requirements and create Spring Boot microservices and features.
- Designing and developing solutions and features in accordance with applicable standards.
- Examining and fixing bugs discovered during the process and delivering them to production as part of continuous releases.

➤ Cogeco Inc. – Internet Protocol TV & Darwin

Tech Stack: Netcracker Suite, Java, Spring Boot, Spring framework, Microservices, SQL, AWS

Project Description: DARWIN & IPTV product solution is to provide OSS services to clients via the Internet, TV (TiVo & IPTV), and phone, including resource provisioning, and activation. The team has been using the Netcracker Order Processing framework to provide OSS services.

Technology Analyst

Infosys Limited | Bengaluru & Chandigarh | Dec 2017 – Jan 2019

Technology Analyst with Spring Boot and Microservices expertise at Infosys.

- Developing Spring Boot microservices for specific functionality was my part of the role.
- Use test-driven development to implement efficient feature attributes.
- Work with a cross-functional team and engage in all phases of the development lifecycle.

TOOLS

Databases

- Oracle
- MySQL
- SQL Server

Development IDE

- Eclipse
- IntelliJ

Source Code Management

- SVN
- GitHub
- GitLab

Software Tools

- JIRA
- Putty
- Maven
- WinSCP
- Postman
- Oracle SQL Developer

➤ General Electric – Smart Intermodal Management System

Tech Stack: Java, Spring Boot, Spring framework, Microservices, SQL, Angular, CloudFoundry

Project Description: SIMS (Smart Intermodal Management System) is GE's new real-time Terminal Operating System. SIMS features are built using a micro-services architecture using cloud technologies. Platform-as-a-service capabilities provide the foundation on which Smart Intermodal is built. External systems interact with SIMS features via RESTful web services.

Software Engineer

HCL Technologies Limited | Chennai & Noida | Dec 2014 – Dec 2017

With HCL Technologies, I worked as a Software Engineer on application development.

- Design and build a high-volume, low-latency web-based application.
- Responsible for development of post processing codes form multiple IRS tax forms.
- Undertake analysis and modify the existing modules as per changes requests.

➤ Intuit – Data Extraction Services

Tech Stack: Java, Hibernate, Spring Framework, SQL, AbbyFlexiCapture Engine

Project Description: CTO DEV is a solution built for Intuit customers. This solution is based upon the integration of the Abby FlexiCapture engine and post processing code for successful extraction of data in the desired format by the customer.

➤ NIC – EASI Core Insurance

Tech Stack: EBao Product, Java, Hibernate, Spring Framework, Servlets, JSP, SQL

Project Description: NIC – EASI is an enterprise solution built for NIC. This solution is an integration of enterprise applications such as EBao (vendor product for insurance), Customer Relationship Management (CRM), Human Resources Management System (HRMS), Master Data Management (MDM), Oracle Application, IDM, and Oracle Business Intelligence.

ACHIEVEMENTS

- Received a spectacular success award for fully owning IPTV product development and launching on time for the customer.
- Received an above-and-beyond award for great work potential and unwavering commitment to clients.
- Nominated for Pinnacle awards under category (Rising Star – Lateral) for outstanding contribution to the project.
- Secured several live wire appreciation awards for dedication and outstanding quality of work.
- Certified Agile Professional post completion of e-Learning, classroom training and online assessment.
